

FOOD IS MEDICINE

WHAT IT MEANS

Using everyday foods to improve and support your health and reduce your cancer risk.

WHY IT MATTERS

- Helps your body stay strong.
- Supports healing.
- Helps reduce inflammation.

EAT MORE

- Fruits and vegetables.
- Whole grains.
- Beans and plant foods.
- Lean meat.

LIMIT

Processed foods – foods that have been changed from their natural form in some way before you eat them.

Too much salt – including adding salt to foods.

REMEMBER

You do not have to change everything at once.
